Ph.no: 838-934-0334

PROFESSIONAL SUMMARY

- Over 6 years of IT experience in Java/J2EE application development, design, and implementation across Banking, Finance, E-Commerce, Healthcare, Retail, and Investment Banking domains.
- Strong expertise in Core Java, Java 6/8/11/17+, J2EE application components, JSP, Servlets, Custom Tag libraries, JavaScript, Session EJBs, JDBC, Spring Boot, Spring MVC, Spring Cloud, Spring AOP, Spring Security, RESTful APIs, GraphQL APIs, API Gateway, JWT authentication, custom plugins, and microservices architecture.
- Hands-on experience developing scalable backend applications using Java and Python with AWS services including Lambda, S3, EC2, RDS, ELB, CloudWatch, Glue, Route 53, API Gateway, IAM, AWS Backup, ECS, EKS, auto-scaling, and event-driven serverless architectures.
- Experienced in cloud-native and hybrid application development across AWS, Azure, and GCP, using Azure App Services, Azure SQL, Azure Storage, Azure Active Directory, GKE, Cloud SQL, Cloud Storage, Pub/Sub, Cloud Functions, Kubernetes, ECS, EKS, and automated CI/CD pipelines.
- Strong experience in event-driven architecture and real-time messaging using Apache Kafka, Kafka Streams, IBM MQ, Kafka deployments in AWS environments, and API-based communication for critical application workflows.
- Skilled in front-end and UI development using Angular 6–12, React, Node.js, Hooks, Redux, React Router, HTML5, CSS, JavaScript, TypeScript, Bootstrap, jQuery, AJAX, Jasmine, Karma, and Protractor.
- Proficient in database, data warehousing, and ORM technologies including DB2, Oracle, MySQL, Snowflake, Snowflake SQL, data modeling, ETL/ELT, Snowpipe, Streams, Tasks, stored procedures, data ingestion, SQL optimization, complex SQL queries, root cause research and analysis, PL/SQL, triggers, Hibernate, JPA, JDBC, Hadoop-based applications, Big Data, XML, Shell Scripting, Windows, UNIX, and Linux.
- Experienced in DevOps, CI/CD, containerized deployments, and secure software delivery using Jenkins, Jules Jenkins, Jenkins Pipelines, Docker, Kubernetes, OpenShift, Git, GitHub, Bitbucket, Maven, Gradle, Ant, Fortify, Sonatype, SonarQube, Splunk, Apache Tomcat, WebSphere, WebLogic, EKS, ECS, and infrastructure automation.
- Skilled in testing, monitoring, collaboration, and development methodologies including Agile, Scrum, Jira, Confluence, SharePoint, TDD, BDD, Cucumber, JUnit, Mockito, end-to-end testing, sprint planning, CloudWatch alarms, Splunk log monitoring, API validation, code quality checks, and production troubleshooting.
- Additional expertise includes AI/GenAI application integration, Azure OpenAI, OpenAI APIs, Claude AI, AWS AI services, LLMs, RAG, vector databases, prompt engineering, AI API orchestration, Salesforce CRM integrations, ETL workflows using Mulesoft and Databricks, Tableau CRM, Power BI, Java performance tuning with VisualVM and JMC/JFR, asynchronous processing, API security, MVC architecture, design patterns, and IDEs including Eclipse, IntelliJ, RAD, VS Code, and Cursor AI.

TECHNICAL SKILLS:

Programming Languages	Java 6, Java 8, Java 11, Java 17+, J2EE, JSP, Custom Tag Libraries, JavaScript, Typescript, Python, C++, C#, Perl
Scripting Languages	Shell Scripting, Typescript
Web (Frontend) Tech	HTML5, CSS3, JavaScript ES6, WOW Framework, Bootstrap 4, Angular 4/5/8/10/11, React 16.
Web (Backend) Tech	J2EE, JSP, Servlets, Session EJBs, JDBC, Spring Boot REST API Web Services, Batch Jobs, Web Services, Data JPA, JPA, GraphQL, Hibernate, Node.js (Express.js), D3.js, Chart.js, Next.js, NET / ASP.NET Core, APIs, API Gateway, JWT Authentication, API Security, Gateway Plugins, Custom Plugins, MVC Architecture
Messaging Tech	Microservices with Kafka, Vert.x, Apache Kafka, IBM MQ
RDBMS Database	DB2, Oracle 12c/10g/9i, MySQL, Oracle PL/SQL, Complex SQL, SQL Tuning, Root Cause Research & Analysis
NoSQL Database	Mongo DB
Data Warehousing	Snowflake, Snowflake SQL, Data Warehousing, Data Modeling, ETL/ELT, Data Ingestion, Snowpipe, Streams, Tasks, Stored Procedures, Data Transformation Pipelines, Query Optimization
AI / GenAI	AI/GenAI Integration, Azure OpenAI, OpenAI APIs, Claude AI, AWS AI Services, LLMs, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering, AI API Orchestration, Intelligent Workflow Automation
DevOps & CI/CD	Jenkins, Jules, GitLab CI/CD, Docker, Kubernetes, OpenShift, Terraform IaC, Ansible, Maven, Gradle, Fortify, Sonatype, Azure DevOps Pipelines, Git, Build & Release Automation, Infrastructure Monitoring, Agile/Scrum

Build Tools	Maven, Gradle, Cypress
Testing Tools	JUnit, Mockito, Jasmine, Karma, Protractor, Apache JMeter
Version Controls	GitHub, Bit Bucket, SVN
Cont. & Orch. Tech	Docker, Docker Hub, Kubernetes, OpenShift
Cloud providers	AWS, GCP, Microsoft Azure (Azure App Services, Azure Functions, Azure SQL, Azure Storage, Azure Active Directory, Azure DevOps), AWS Glue, AWS Lambda, EC2, S3, RDS, ELB, CloudWatch, Route 53, API Gateway, IAM, AWS Backup, ECS, EKS
Web/Application Servers	IBM WebSphere Application Server 8.0, WebSphere, WebLogic, Tomcat 7.0/8.0.
Big Data & Distributed Processing	Apache Spark, Hadoop
IDE(s) and Code Editors	RAD 7.5+, Eclipse, IntelliJ IDEA, Spring Tool Suite (STS), Visual Studio Code, Cursor AI
Performance Tools	VisualVM, JMC/JFR, Async, JUnit Performance Testing
Dev Methodologies	Agile and Waterfall
Operating Systems	SuSE Linux 11, UNIX, Linux, Windows, macOS, Sun Solaris, VMware
Development Tools	TOAD, SQL Developer, Putty, Confluence, SharePoint

WORK EXPERIENCE:

JP Morgan Chase | Wilmington, Delaware

March 2026 – Present

Role: Senior Software Developer

Responsibilities:

- Designed and supported Chase Bank internal backend systems using **Java 8, Java 11, Java 17+, J2EE, Python, C++, C#, Perl, Spring Boot, Spring MVC, Spring Security, REST APIs, GraphQL, Hibernate, JPA, Data JPA, Oracle PL/SQL, MySQL, and MongoDB.**
- Designed, deployed, and supported **100+ internal services**, including new **inbound APIs, outbound APIs, API Gateway** integrations, backend service routes, **JWT Authentication, JWT Validation, API Security, Gateway Plugins, and Custom Plugins.**
- Built scalable microservices and real-time backend integrations using **Spring Boot Microservices, Apache Kafka, IBM MQ, Microservices with Kafka, Vert.x, Node.js / Express.js, .NET / ASP.NET Core**, and event-driven architecture.
- Developed and supported frontend and web application components using **HTML5, CSS3, JavaScript ES6, TypeScript, WOW Framework, Bootstrap 4, Angular 4/5/8/10/11, React 16, D3.js, Chart.js, and Next.js.**
- Managed service deployment, release automation, secure code scanning, artifact governance, and **CI/CD pipelines** using **Jenkins, Jules, GitLab CI/CD, Azure DevOps Pipelines, Docker, Docker Hub, Kubernetes, OpenShift, Terraform IaC, Ansible, Maven, Gradle, Fortify, Sonatype, Cypress, Git, GitHub, Bitbucket, and SVN.**
- Supported cloud-native and containerized deployments using **AWS, GCP, Microsoft Azure, Azure App Services, Azure Functions, Azure SQL, Azure Storage, Azure Active Directory, AWS Glue, AWS Lambda, EC2, S3, RDS, ELB, CloudWatch, Route 53, IAM, AWS Backup, ECS, and EKS.**
- Supported deployment automation, API onboarding, gateway configuration, plugin validation, infrastructure monitoring, documentation, and production support using **Agile/Scrum, Jira, Confluence, SharePoint, Splunk, CloudWatch, SonarQube, JUnit, Mockito, Apache JMeter, VisualVM, JMC/JFR, WebSphere, WebLogic, Tomcat, Eclipse, IntelliJ IDEA, and VS Code.**
- Integrated **AI/GenAI capabilities** into enterprise workflows by orchestrating **Azure OpenAI, OpenAI APIs, Claude AI, AWS AI services, LLMs, RAG patterns, vector databases, prompt engineering, and AI API orchestration** for intelligent Java-based application features.
- Worked with **Snowflake** for enterprise data warehousing, **Snowflake SQL, data modeling, ETL/ELT, data ingestion, Snowpipe, Streams, Tasks**, stored procedures, data transformation pipelines, and Java-to-Snowflake integrations supporting high-volume data processing and analytics workloads.
- Used **Akamai** for traffic routing and edge traffic management, and worked with **Kong Manager** to manage API services, routes, plugins, gateway configurations, and secure inbound/outbound API traffic for Chase internal backend systems.

Environment: Java 8/11/17+, J2EE, Python, JavaScript, TypeScript, Spring Boot, Spring MVC, Spring Security, REST APIs, GraphQL, API Gateway, JWT, Hibernate, JPA, Oracle PL/SQL, MySQL, Snowflake, Snowflake SQL, Snowpipe, Streams, Tasks, ETL/ELT, Data Modeling, Azure OpenAI, OpenAI APIs, Claude AI, AWS AI Services, LLMs, RAG, Vector Databases, Prompt Engineering, AI API Orchestration, Kong Manager, Akamai, MongoDB, Apache Kafka, IBM MQ, Vert.x, Node.js, Angular, React, Jenkins, GitLab CI/CD, Azure DevOps, Docker, Kubernetes, OpenShift, Terraform, Ansible, Maven, Gradle, Fortify, Sonatype, Git, GitHub, AWS, ECS, EKS, Lambda, EC2, S3, RDS, CloudWatch, IAM, GCP, Microsoft Azure, Splunk, SonarQube, JUnit, Mockito, JMeter, VisualVM, JMC/JFR, RAD, IBM WebSphere, WebLogic, Tomcat, Eclipse, IntelliJ IDEA, VS Code, Cursor AI, Jira, Confluence, SharePoint, Agile/Scrum.

Role: Sr Java Developer**Responsibilities:**

- Involved in the complete **SDLC** of insurance, financial, and claims processing systems from requirement analysis, design, development, testing, deployment, and production support, developing and deploying **Java applications** in an **Agile** environment while integrating **DevOps** practices to improve code quality and deployment speed.
- Designed and developed **Java microservices** for insurance and claims systems using **Spring MVC, Spring Boot 2.3, Spring Batch, Spring Data, Spring IOC, Spring AOP, Spring Security, Spring Cloud, Netflix Eureka, Spring Ribbon, and Spring Hystrix**, handling authentication, authorization, client-side load balancing, circuit breaker patterns, and distributed service communication.
- Implemented and exposed enterprise **APIs, RESTful APIs, Spring Boot REST API Web Services, Spring RESTful Template, Swagger, GraphQL APIs, ASP.NET RESTful Web Services**, and backend integrations using **MVC design patterns, API security**, and service-based architecture to support claims, policy, payment, and financial application functionality.
- Performed Java coding and development for web applications supporting claims, policy, and Integrated Eligibility Systems (IES) workflows using **Java 6/8/17+, J2EE, JSP, Custom Tag Libraries, JavaScript, Session EJBs, and JDBC**, following **MVC architecture** and object-oriented design principles.
- Designed event-driven and real-time microservices using **Apache Kafka, IBM MQ, Zookeeper, Vert.x, D3.js, and Chart.js** for asynchronous event handling, message processing, real-time data streaming, and high-performance data access across distributed insurance and financial applications.
- Developed user interface and single-page application components using **HTML5, CSS3, Bootstrap 4, Angular 8, Angular Router, lazy loading, WOW.js, Python, Cypress, TypeScript 3, and Perl**, including reusable components and services to consume backend **REST APIs** and claims-related services using Angular component-based architecture.
- Worked on database development and optimization for insurance and claims data by creating new tables, **Oracle PL/SQL** stored procedures, functions, views, indexes, constraints, triggers, and SQL tuning, while also using **JPA, Hibernate**, entity beans, **MongoDB Java Driver, MongoDB CRUD operations**, query optimization, transactions, and NoSQL data models such as document, key-value, and graph models.
- Wrote and optimized complex SQL queries for **DB2, Oracle**, and relational databases, performing root cause research and analysis for production issues, data defects, batch failures, and application performance problems across insurance and IES-related business processes.
- Worked extensively with **Snowflake** for data warehousing, data modeling, **Snowflake SQL** development, **ETL/ELT**, data ingestion, query tuning, **Snowpipe, Streams, Tasks**, stored procedures, and data transformation pipelines supporting insurance data processing and reporting workflows.
- Collaborated with data engineering and AI/ML teams to integrate **AI/GenAI** features into Java-based applications using **Azure OpenAI, OpenAI APIs, Claude AI, AWS AI services, LLMs, RAG**, vector databases, prompt engineering, and AI API orchestration for intelligent workflow automation.
- Deployed and managed enterprise applications across **AWS, GCP, and Azure**, using **AWS EC2, AWS Lambda, AWS ECS, AWS EKS, Kubernetes, OpenShift, Docker, AWS RDS, DynamoDB, IAM, Security Groups, GKE, Cloud SQL, Pub/Sub, Azure App Services, Azure Functions, Azure SQL Database, and Azure Storage**, including Docker-contained Spring Boot microservices, Kubernetes/OpenShift workloads, ECS task definitions, EKS clusters, and scalable cloud deployments.
- Built and maintained automated build, release, testing, monitoring, code scanning, dependency governance, and deployment pipelines using **Jenkins, Jenkins Pipeline, Maven, Docker Images, Docker Containers, Docker volumes, Docker Artifactory, Kubernetes, OpenShift, Fortify, Sonatype, Git, STS, Eclipse, Log4j, JUnit, Mockito, Jasmine, Karma, Apache JMeter, VisualVM, and Java Mission Control / JMC/JFR** for CI/CD automation, code coverage, unit testing, performance testing, JVM monitoring, debugging, and application lifecycle automation.
- Used **RAD 7.5+** as the primary Java IDE for developing, debugging, building, and maintaining J2EE web application components, including JSPs, Custom Tag Libraries, Servlets, Session EJBs, JDBC modules, and service-layer components for claims, policy, and IES-related workflows.
- Configured and deployed Java/J2EE applications on **IBM WebSphere Application Server 8.0**, managing application server profiles, data sources, connection pools, JMS resources, deployment descriptors, and environment properties across development, QA, and production environments.
- Performed WebSphere troubleshooting and production support by reviewing server logs, analyzing JVM behavior, resolving deployment failures, validating EAR/WAR deployments, monitoring application startup issues, and coordinating fixes for batch jobs, web services, and database connectivity issues.
- Supported batch job and web services development using **IBM WebSphere Application Server 8.0, RAD 7.5+, SuSE Linux 11, and VMware**, applying **Singleton, Factory, and DAO** design patterns to improve maintainability and application reliability.

Environment: Java 6/8/17+, J2EE, JSP, Custom Tag Libraries, JavaScript, Session EJBs, JDBC, Integrated Eligibility Systems (IES), Spring Boot 2.3, HTML5, CSS3, Python, AWS Glue, Cypress, Azure, Angular 8, Spring MVC, Servlets, Spring AOP, Spring Batch, Oracle PL/SQL, DB2, Complex SQL, Snowflake, Snowflake SQL, Snowpipe, Streams, Tasks, ETL/ELT, Data Modeling, Azure OpenAI, OpenAI APIs, Claude AI, AWS AI Services, LLMs, RAG, Vector Databases, Prompt Engineering, AI API Orchestration, ASP.NET, GraphQL, Spring Boot Microservices, Vert.x, Apache Spark, JMeter, SOAP Web Services, React 16, Node.js, RESTful APIs, MVC Design Patterns, VisualVM, API Gateway, JWT Authentication, API Security, IBM WebSphere Application Server 8.0, RAD 7.5+, SuSE Linux 11, VMware, AWS EC2, AWS Lambda, AWS ECS, AWS EKS, AWS RDS, DynamoDB, AWS IAM, GCP, GKE, Cloud SQL, Pub/Sub, Azure App Services, Azure Functions, Azure SQL Database, Azure Storage, Jenkins Pipeline, Docker, Kubernetes, OpenShift, Apache Kafka, IBM MQ, STS, Git, Agile, DevOps, CI/CD, Fortify, Sonatype, Confluence, SharePoint, JMC/JFR, JPA, Hibernate, TypeScript, Bootstrap 4, Spring Security, JUnit, Maven, MongoDB, Jasmine, Karma, Mockito, PostgreSQL, Jira, Jenkins, Log4j, GitLab, Eclipse, IntelliJ IDEA, Cursor AI.

HCL Technologies| Bengaluru, India

Dec 2018 – March 2022

Role: Java Developer

Responsibilities:

- Responsible for gathering and understanding system requirements by interacting with clients, generating **Class diagrams**, **Sequence diagrams**, and **Activity diagrams** extensively for all processes, and implementing **Agile methodologies**, **SDLC concepts**, requirement analysis, design, development, testing, and deployment activities.
- Developed applications using **Python**, **Java**, **Java 17+**, **C#**, **C++**, **Perl**, and **Object-Oriented Programming** concepts including **Collections**, **Exception Handling**, **Multithreading**, **Java I/O**, and **Generics**, while implementing business logic using **Spring 4**, **Spring Framework 4**, **Spring Core**, **Spring IoC dependency injection**, **Spring MVC**, **front controller pattern**, **Struts Web MVC**, **Action Servlet**, **Singleton**, **MVC**, and **Factory design patterns**.
- Worked on **eCommerce application development at HCL**, building **Java** and **Spring-based backend services** for **product catalog**, **orders**, **payments**, high-traffic transactions, and reliable backend processing, while designing, developing, and consuming **ASP.NET**, **RESTful Web Services**, **SOAP-Web Services**, **REST APIs**, **APIs**, **API Gateway**, **JWT Authentication**, **API Security**, **Gateway Plugins**, **Custom Plugins**, and **Spring MVC** based service integrations.
- Developed and deployed **Java-based applications** and **microservices** on **GCP** using **Compute Engine**, **Cloud SQL**, **Cloud Storage**, **GKE**, and built automated **CI/CD pipelines** integrated with GCP services for deployment, monitoring, and logging; also developed and deployed banking applications on **Azure** using **Azure App Services**, **Azure Functions**, **Azure SQL Database**, **Azure Storage**, **Azure DevOps**, and automated builds, deployments, and environment configurations.
- Developed and integrated **REST APIs** with **AWS** services including **S3**, **Lambda**, **EC2**, **AWS Glue**, **AWS ECS**, **AWS EKS**, **AWS RDS**, **DynamoDB**, **IAM**, **Security Groups**, **CloudWatch**, **Route 53**, and **API Gateway**, supporting scalable backend services, cloud-based deployments, ETL workflows, automated data transformation, and Java/Python-based data processing pipelines.
- Implemented **Kafka-based messaging**, **IBM MQ messaging**, **JMS persistent messages**, and store-and-forward messaging for real-time data processing, while developing **GraphQL services**, **Node.js**, **Express.js**, **Next.js** middleware services, and backend integrations with **MySQL**, **Oracle**, **Oracle Database**, **PL/SQL**, stored procedures, functions, triggers, complex SQL queries, transaction processing, performance tuning, and reduced server-client traffic.
- Developed UI and web components using **HTML5**, **CSS3**, **JavaScript**, **jQuery**, **Cypress**, **TypeScript**, **JSP view components**, **WOW.js**, **D3.js**, and **Chart.js**, implementing smooth scroll effects, animation effects, interactive scroll-based UI features, data analytics, visualization frameworks, and improved user experience across application pages.
- Used **Hibernate** as an ORM tool in the Data Access Layer; configured **WebLogic** content management, developed **Single Sign-On (SSO)** functionality, performed batch data processing using **Apache Spark**, conducted API performance and stress testing using **Apache JMeter**, monitored JVM performance using **VisualVM** and **Java Mission Control / JMC/JFR**, implemented **Log4j** logging, documented project updates in **Confluence** and **SharePoint**, and used **Eclipse**, **IntelliJ IDEA**, **Git**, **Maven**, **Docker**, **Kubernetes**, **OpenShift**, **Fortify**, **Sonatype**, **Jenkins**, **Jenkins Pipeline**, **DevOps**, and **CI/CD** practices for development, deployment, debugging, and application support.
- Used **RAD** for Java/J2EE application development, debugging, build validation, code merges, and local server testing, improving developer productivity during feature delivery and defect resolution cycles.
- Worked with **IBM WebSphere** application server environments to deploy Java web applications, configure application resources, analyze deployment logs, troubleshoot server startup issues, and support production fixes for enterprise web and backend services.

Environment: Java 17+, Java, Typescript, C#, Perl, SQL, Node.js, Python, Spring MVC, Spring Core, Spring 4, Hibernate, Struts, Spring IoC, Singleton, MVC, Factory Design Patterns, Oracle PL/SQL, HTML5, AWS Glue, CSS3, Apache Kafka, IBM MQ, GraphQL, JavaScript, WOW, jQuery, Bootstrap, Azure, Cypress, MySQL, Oracle, ASP.NET, Hibernate, Apache Tomcat, JMeter, Apache Spark, VisualVM, JMC/JFR, Async, Vert.X, RAD, IBM WebSphere, WebLogic, Eclipse, IntelliJ IDEA, Git, Maven, Log4J, Scrum, JMS, WebLogic Content Management, RESTful Web Services, APIs, REST APIs, API Gateway, JWT Authentication, API Security, Gateway Plugins, Custom Plugins, SOAP-Web Services, Microservices, Spring Boot, Spring Boot Microservices, AWS S3, AWS Lambda, AWS EC2, AWS ECS, AWS EKS, AWS RDS, DynamoDB, AWS IAM, Security Groups, CloudWatch, Route 53, GCP, Compute Engine, Cloud SQL, Cloud Storage, GKE, Azure App Services, Azure Functions, Azure SQL Database, Azure Storage, Azure DevOps, Jenkins, Jenkins Pipeline, Docker, Kubernetes, OpenShift, Fortify, Sonatype, Confluence, SharePoint, CI/CD, DevOps, Git Repositories, Automated Builds, Automated Deployments, Monitoring, Logging.

EDUCATION

MS INFORMATION SCIENCE, STATE UNIVERSITY OF NEW YORK, ALBANY, NEW YORK.

August 2022 – May 2024

CGPA- 4/4

Certifications:

- Advanced Microsoft SQL Training
- Oracle Database: Advanced PL/SQL
- Oracle Database: PL SQL
